

# CASE STUDY

**Client:** CBS Outdoor

**Product:** Railmaster

**“ THE RAILMASTER PLATFORM, CUSTOM DESIGNED FOR OUR CLIENT, PROVIDED A SOLUTION FOR THIS UNIQUE CHALLENGE ”**

## THE CHALLENGE

Youngman were approached by CBS Outdoors to provide an access solution for their workers.

CBS Outdoor own all advertising space on the London Underground and require safe access when working close to the rail tracks. Workers require access to apply dry posting of advertisements on the tunnel walls opposite platforms at various stations on the London Underground.

## THE BRIEF

Rail standards state that ladders can not be used on the London Underground rail network.

Stringent Work at Height requirements and rail industry standards also meant products currently on the market were unsuitable for the challenge.

CBS Outdoors required a roller system platform that fixed onto the railway track with a walk way over the tracks for workers to use and avoid contact with the track.

## THE SOLUTION

The Railmaster platform, custom designed for our client, provided a unique solution for this unique challenge. It clamps onto the rail and moves along the track on rollers to as safely and efficiently place posters in position.
