

CASE STUDY

Client: Speedy Hire

Service: Training

“ THIS WAS
A GREAT
SHOWCASE
FOR SPEEDY
AND YOUNGMAN ”

THE CHALLENGE

The Canary Wharf Contractors site at Churchill Place had an urgent need for tool box talks on the safe use of podiums after an accident only a few days before.

THE BRIEF

Youngman were requested to discuss the 'Work at Height' regulations to over 200 operatives, demonstrating podium safety just two days after the request along with toolbox talks and expert knowledge from Youngman.

THE SOLUTION

Speedy were happy to attend as part of their award winning 'Safety from the Ground Up' campaign to discuss 'the Working at height' element of the programme.

This was a great showcase for Speedy and Youngman's to all trades on site, with a grateful main contractor thanking us for the support.

The demonstration day has strengthened the knowledge of the 200+ operatives that attended and helped to develop the relationship between Speedy and CWC, showing their professionalism and resourcefulness to customer demands.

This also helped to engrain Youngman into CWC as a brand of choice, not only as trusted experts but quality and innovative manufacturers.
